Professional Summary

Final-year software engineering student and full-stack developer with professional frontend experience building responsive, accessible, well-tested web interfaces in React and TypeScript. Strong in HTML, CSS, and JavaScript, REST API design, debugging, and both automated and usability testing. Works comfortably in cross-functional Agile teams, documents technical findings clearly, and presents recommendations to other developers.

Key Skills

Languages: JavaScript, TypeScript, HTML, CSS, Java, C#, Python, SQL

Frontend Development: React, TanStack Query, Zustand, Vite, Tailwind CSS; responsive layout, UI/UX design, web accessibility (WCAG), internationalization (i18n)

Backend & APIs: REST API design with OpenAPI & Orval, Node.js, Express, MongoDB with Mongoose ODM, Firebase (Firestore, Auth, Security Rules), Java/Spring Boot (cross-team)

Testing & Debugging: Vitest, Playwright, jsdom, MSW; unit, component, end-to-end, manual, cross-browser & usability testing

Tools & DevOps: Git (rebase, feature branching, PR review), Docker, CI/CD, Jira, Trello, Postman, VS Code, Android Studio (Kotlin, Jetpack Compose)

Agile Methodologies: Scrum and Kanban, sprint-based delivery, cross-functional collaboration

Work Experience

Frontend Developer Co-op Intern | AiFinancial, Toronto, ON

May 2026 – Aug. 2026

- Researched and evaluated API integration approaches (Orval, Pact, Hey API, openapi-typescript), documented the findings as ADR-0005, and presented the recommendation to other development teams
- Identified inconsistencies between frontend API usage and backend REST contracts and helped introduce Orval to generate TypeScript API clients from the backend OpenAPI specification
- Migrated production React components from hand-written fetch patterns to auto-generated TanStack Query hooks, reducing component code by ~60% per component
- Built Phase 1 prototype infrastructure (Orval code generation, MSW test server, TanStack Query wiring) in a pnpm monorepo with MSAL authentication
- Wrote Vitest component tests with MSW mock handlers and debugged a token synchronization defect between two ApiClient instances in the authentication flow
- Worked in a cross-functional Agile team alongside React/TypeScript frontend and Java/Spring Boot backend developers, using feature branches, rebasing, pull requests, Docker, and CI/CD

Software Development Intern | Up4 The Challenge (STEMflower), Toronto, ON

June 2026 – Aug. 2026

- Designed and built bilingual (English/French) UI for a K-12 STEM education web app used in classroom workshops, covering a 16-page student activity flow in HTML, CSS, and JavaScript
- Ran usability testing with teachers during live workshops and shipped the resulting UX changes, including direct dashboard navigation, one-click preview, and reordered student responses
- Rebuilt copy baked into 14 background images as live, responsive DOM text via a Node.js/pngjs pipeline, restoring screen-reader access, text zoom, and find-in-page (WCAG)
- Hardened the app by closing 3 privilege-escalation gaps in Firebase Firestore security rules and 2 DOM-based XSS vectors, backed by Playwright and jsdom suites running 264 automated checks

Restaurant Data & Tech Assistant | Earls Restaurants Ltd, Toronto, ON

Jan. 2024 – Present

- Troubleshoot POS and iPad issues, onboarded staff to new digital tools, and built reporting trackers for a high-volume restaurant team, communicating fixes to non-technical users

Education

Software Engineering Technology - Artificial Intelligence Advanced Diploma

Sept. 2023 – Dec. 2026

Centennial College, Toronto, ON | Cumulative GPA: 3.93 / 4.5

Key Coursework: Client-Side Web Development | Web Interface Design | Web Application Development | Mobile Apps Development (Android Studio) | Software Testing & Quality | Data Structures & Algorithms | Software Systems Design | Software Requirements Engineering | IT Project Management
